

Professional Services

It is a pleasure to introduce myself and present a proposal for the development of your e-learning platform, designed to provide an intuitive and optimized user experience.

My service includes:

- Development of customized web applications.
- Implementation of robust and scalable backend technologies.
- Ongoing support and maintenance to ensure the platform's optimal performance.

I guarantee an excellent price to ensure the project meets your expectations and objectives. The proposal is structured in phases to facilitate execution and respective payments.

Services Offered

1. E-Learning Platform Development:

- **Custom Design and Development:** Design of an attractive, easy-to-use interface tailored to the needs of your target audience, with an intuitive navigation structure. The cost for this service is **\$1,200 USD**.
- **User Registration and Authentication:** Secure registration and login system, with social authentication options (Google, Facebook) and password recovery. The cost for this feature is **\$300 USD**.
- **Course Management:** Admin panel to create, edit, and delete courses, assign modules and lessons, and manage multimedia content (videos, text, quizzes). The cost for this feature is **\$500 USD**.
- **Exams and Certificates:** Functionality to create multiple-choice exams, show results after completion, and generate certificates. The cost for this service is **\$400 USD**.
- **Notifications:** Notification system via email or within the platform, such as reminders for exams or new courses available. The cost for this feature is **\$150 USD**.
- **Mobile Optimization:** Responsive design to ensure a proper experience on any device (mobile, tablet, desktop). The cost for optimization is **\$200 USD**.

2. Security and Accessibility:

- **HTTPS Protocol:** Implementation of an SSL certificate to ensure user data security during navigation and information exchange. The cost for this service is **\$100 USD**.
- **Data Protection:** Compliance with security regulations such as GDPR to ensure user privacy and protect personal data. The cost for this service is **\$150 USD**.

3. Integration and Additional Support:

- **Payment Gateway Integration:** Implementation of systems such as Stripe or PayPal to allow payments for courses. The cost for integration is **\$250 USD**.
- **Storage and Hosting:** Provision of space on a secure and efficient server to host the platform. The cost for hosting is **\$200 USD** per year, and the cost for the domain is **\$30 USD** per year.
- **SEO Optimization:** Enhancements to ensure the platform is easily indexed by search engines and increases its online visibility. The cost for this service is **\$150 USD**.

4. Ongoing Support and Maintenance:

- **Monthly Maintenance:** Ongoing technical support for system updates, bug fixes, and new features. The cost for monthly maintenance is **\$100 USD**.

Service Exchange Proposal

PART #1: E-Learning Platform Development

- The total cost for the development of the platform, including everything mentioned above, is **\$3,730 USD**. This payment covers all aspects of the development and initial implementation of the platform.
- **Payment Method:** Payment for the services will be made via **bank transfer**. An advance payment of **50%** will be made, with the remaining **50%** paid upon completion of the project.

PART #2: Hosting and Domain

Hosting and domain are essential components to ensure your platform is always online and accessible to users. Below are the costs:

- **Domain (.com):** Annual cost of **\$30 USD**. This payment covers the purchase and renewal of the domain for the platform (e.g., www.CenfoCourses.com).
- **Web Hosting:** Monthly cost of **\$20 USD** for hosting the platform on a secure and highly available server.

Important Notes:

- **Updates and Additional Features:** Updates to the platform or the implementation of new features beyond the initial scope of the project will be charged separately. This includes any modification not covered by the original budget.
- **Delivery Time:** The estimated delivery time for the platform is **8 to 12 weeks** from the confirmation of the initial payment, depending on the complexity and specific requirements that may arise.
- **Intellectual Property:** Once the project is completed and full payment is made, the client will own the platform, including the source code and all associated resources.
