Soft Skills

- **Responsibility**
- **Respect**
- **Adaptability**
- **Empathy**
- **Ethics**

Languages

Spanish: Native

English: Intermediate

Education

2017
High School
Colegio de Santa Ana

2022
Software Development Technician
Universidad Cenfotec

2021- Present
Software Engineer
Universidad Cenfotec

Projects

Universidad Cenfotec

Technologies used: HTML, CSS, JavaScript, jQuery, SQL
Methodology: SCRUM

I developed a web application for managing reservations, utilizing frontend technologies such as HTML, CSS, and JavaScript, along with SQL databases for handling user information. I worked as part of an agile team following the SCRUM methodology, ensuring the timely delivery of key features. This project improved the user experience and met all established requirements, allowing me to strengthen my web development skills and teamwork within an agile environment.

Universidad Cenfotec

Technologies used: .NET Framework, SQL, Azure
Methodology: SCRUM

I led the development of a vehicle rental platform, using .NET and Azure as the technological foundation. I implemented the functionality for managing reservations and users, with an SQL database to store vehicle and customer information. Working as a team under the SCRUM methodology, we overcame technical challenges related to cloud service integration, delivering a robust and scalable solution that met the project objectives.
